

Silent Partner Pro

New Release Software 2016

Features

- ✓ Simple, Easy, Powerful
- ✓ Flexible Graphing Package
- ✓ Multi-Rate Tariffs
- ✓ Automatic Energy Costing
- ✓ Automatic Reports, Export File
- ✓ Excellent Zooming Function
- ✓ Real Time Meter Mode

Applications

- ✓ Investigate over charging, under charging
- ✓ Investigate inaccurate revenue billing meters
- ✓ Monitor voltage sags, swells, and current profiles
- ✓ Customer complaint diagnosis
- ✓ Monitoring vacant buildings
- ✓ Peak Shaving and Load Management
- ✓ Find loose neutrals

Silent Partner Pro Software - Simple, Easy, Powerful

Silent Partner Pro software allows you to download, save, retrieve and analyze data collected by the Silent Partner series products. The software will run on any PC running Windows XP, Windows 7, and Windows 8.

More than Just Graphs!

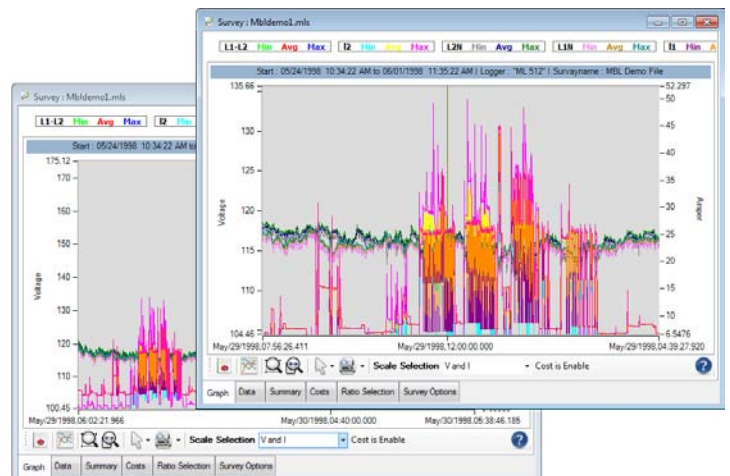

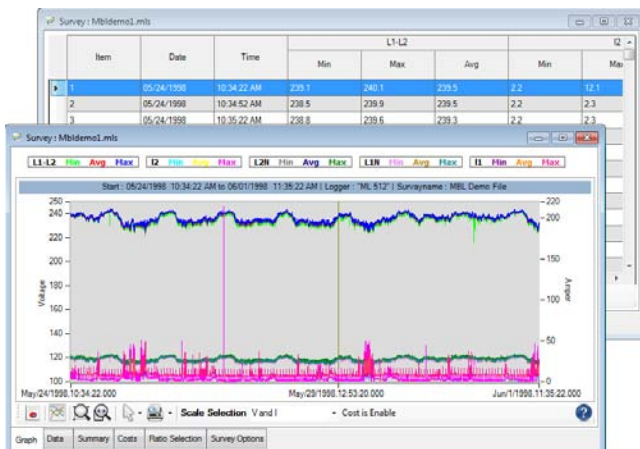

Silent Partner Pro is a lot more than just data logging software package. This one is designed so that energy managers and engineers can create effective graphs and reports instantly, save money and energy from day one, and share their results with their colleagues. It's also very simple and friendly to use, and won't have you reaching for the User Manual every time you open it! Specifically created for the MBL-40, SPPlus and SPC, Silent Partner Pro integrates seamlessly with the all the devices via a hi-speed USB connection with auto-sensing built-in.

Easy to Use

Silent Partner Pro is a 'task oriented' data logger software package, so even if you are not an expert in utility management it will always guide you in the right direction so that you will achieve accurate reporting first time, every time. It provides full set-up and user-control for the all the instruments allowing you to define survey periods, storage rates and download schedules as well as providing additional features such a battery condition indicator and clock set function.

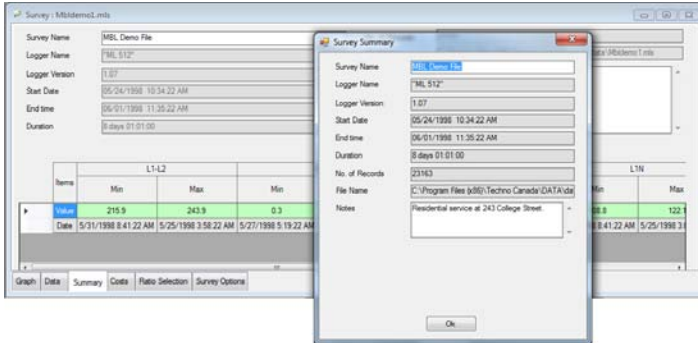

Software Features

- Runs under Microsoft Windows®
- Full colour printer support.
- Built-in export to CSV, MS Excel, MS Word and HTML.
- Allows you to import a bitmap file so you can include your company logo on printed reports.
- View your data in graphical form or view the actual numerical data in tabular form.
- Flexible View graphs from 1 second and up.
- View current and voltage traces on a single graph.
- Enable and disable individual traces to remove on-screen clutter.
- Graphs can be configured to display a single or dual Y-axis.
- Zoom feature allows you to view graphs in maximum detail.

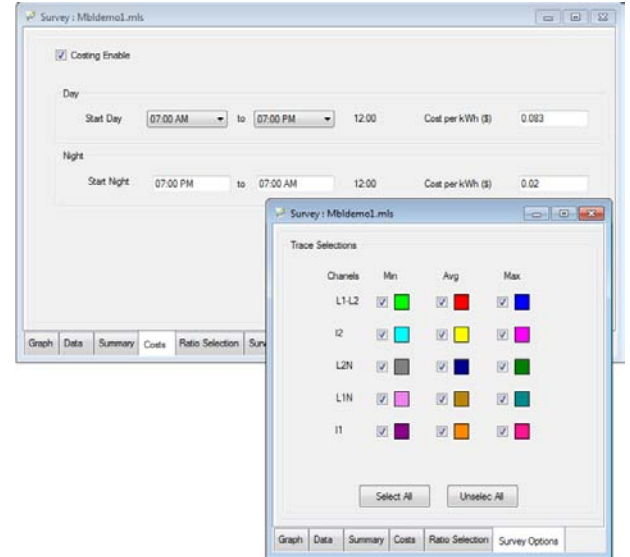

Software Features

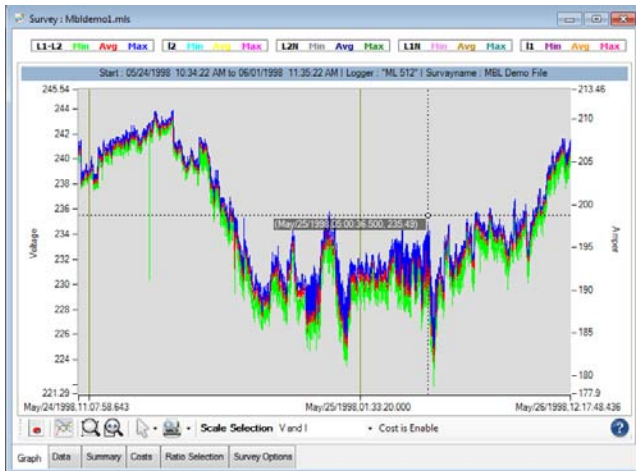

- The Notes box allows you to enter information about the test site, particulars of the hookup, contact names, etc.
- Silent Partner software can download any logger in the Silent Partner family.
- View your data in graphical form or view the actual numerical data in tabular form.

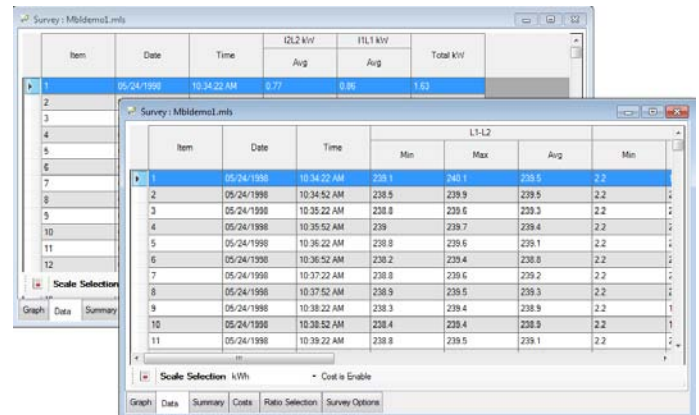

- All setup of sampling rate/storage interval, time and channel configuration is done via software.
- Calculate Power values such as kW, kVAR, kVA, kWh and kWh cost.
- Enable and disable individual traces to remove on-screen clutter.

- The Data Box allows you to view details information on the Graph.

- The Survey Summary gives you concise statistics about your data in one compact report, with min/max reports for each data type.
